TOP TIPS

If required, adjust the pH. Recommended pH range when using the VitaLink products is 5.8-6.5.
You can find everything you need to measure and adjust pH in our VitaLink ESSENTIALS range (vitalink.com).
This growing schedule is suitable for the vast majority of plants grown in favourable environmental conditions.
Please keep in mind that any growing schedule is always dependent on plant species and variety, temperature, humidity, type of substrate and system you are growing in.
Always pay close attention to your plants to find out what their individual requirements are.
