

Ecolizer Feed Schedule for Coco Systems

Week	pH	EC	Basics A & B	Root Up 0.5ml	Grow Up 0.5ml	Bloom Up 0.2ml	Top Up 1ml	Bugs Away 20ml	Enzymen 2ml
veg 1	5.7	1	1ml	×	×			×	×
veg 2	5.7	1.2/1.4	1ml	×	×			×	×
flower 1	5.7	1.4/1.6	2ml		×	×		×	×
flower 2	5.7	1.6	2ml		×	×		×	×
flower 3	5.7	1.6/1.8	3ml		×	×		×	×
flower 4	5.7	1.8	3ml			×		Spray once a week	×
flower 5	5.7	1.8/2.0	4ml			×	×	just before lights	×
flower 6	5.7	1.8/2.0	4ml			×	×	turn off	×
flower 7	5.7	1.8/1.6	3ml			×	×	Use up to	×
flower 8	5.7	1.6/1.2	2ml			×		Week 4	

Ecolizer provides amazing plant growth and exceptional yields. It is the current feed of choice for our head agronomist.

All dosages are per litre

pH can be between 5.2 to 6.0

E.C is for a background level of 0.4 to .08

If the E.C drops then add more food then correct to original figure (re adjust pH)

If the E.C rises then dilute food to original figure (re adjust pH)

To convert E.C to CF then remove the decimal place (1.2 = 12)
