PPM	150-250	450-550	550-650	750-850	850-950	850-950	850-950	850-950	850-950	800-900	0-100

Useful Conversions

* This Feed Program is a General Guide.

1 tsp = 5 ml

1 tbsp = 15 ml

1 oz = 30 ml

1 qt = 946 ml

1 L = 1000 ml

1 gal = 3.785 L

Keep nutrient solution temperature between 68° - 72° F (20 - 22° C)

For best results maintain nutrient solution pH between 5.8 to 6.5.

DUAL FUEL 1+2

Dual Fuel is the simplest and most effective 2-Part Nutrient System on the market. Used in a 1:1 ratio throughout all growth cycles.

It's easy to use for the absolute beginner and yet has been formulated to meet the complex needs of the professional grower.

MASSIVE

Massive Bloom Formulation is an all natural bloom booster that utilizes bee waste including honeycomb to amplify a plant's natural growing processes.

Massive will supercharge your flowers, making them bigger and denser through our unique blend of naturally derived nutrient components.

VITATHRIVE

Vitathrive is a vitamin and mineral solution that reduces plant stress while supporting essential functions.

Formulated to protect your plants when they are most vulnerable, in their cutting and rooting stage, and in bloom to reinvigorate the roots and help with nutrient uptake.

LIQUID WEIGHT

Liquid Weight is an excellent carbohydrate supplement that provides an added energy source for your plants, resulting in impressively large flowers and fruits.

Carbohydrates support both your plant directly and act as a great food source for the microbial life in the root zone.

REZIN

Rezin is a new product from Green Planet that contains a combination of acids created through a complex fermentation process. It's designed to enhance flavour and aromas.

Rezin will not affect your PPM. This means that you can run it with any nutrient program at full strength.
